

Company Profile

Company Overview

Allmach Pneumatic & Fluid Systems is a major wholesaler and distributor of plastic, aluminium and stainless steel piping systems.

Located in both Sydney and Brisbane, Allmach has been an established business for over 25 years with our modern, fully-equipped warehouses stocking a comprehensive range of quality products at economical prices, ensuring impressive turnaround times and competitive pricing.

Sustainability is our business priority.

We primarily focus on areas where our products and services can make a difference in society.

These areas include, water management, agriculture, safety and cost-effective recycling of natural resources.

In our 25 years of operation, Allmach has become an industry leader in innovative piping systems. We have provided piping-related products that have been used in numerous markets and industry sectors and our team is dedicated to supplying clients with superior quality products and services.

Values

Allmach is guided by the following values.

Honesty and Integrity

Providing the highest standards of performance and work, whilst being direct and open in our business dealings and delivering on commitments.

Loyalty

Always enhancing our customer service in order to create satisfying long term relationships with clients.

Respect

Working as a team to create an environment based on dignity, trust and respect for all.

Fabrication & Warehousing

Fabrication

Allmach has a large Fabrication Workshop at the Brisbane branch which is devoted to the creation, design, marketing and distribution of advanced piping systems and solutions to a broad cross section of the industry.

Whether you're looking for custom fabrication, professional consultation or information on standards for various applications you can count on Allmach.

Custom Fabrication

The Fabrication Workshop can assist in your custom fabrication needs. Simply provide your drawings and measurement details and our experienced team will take care of the entire process, from design to dispatch.

Warehousing

Allmach has modern, fully-equipped warehouses in both Sydney and Brisbane allowing for efficient distribution of products Australia wide.

Our large warehouses have an inventory capacity to stock an extensive amount of pipes, fittings, tooling, fixings as well as an extensive range of top quality accessories for compressed air, gas and lubrication systems.

All our products are ordered and stocked in bulk, ensuring customers experience impressive turnaround times and competitive pricing.

We guarantee that, with our integrated computer systems, you can expect a fast preparation of your order and efficient product delivery.

Our warehouses are designed with:

- Advanced heavy-duty equipment and machinery;
- State-of-the-art stocking facilities; and
- Value-added services including records control, technical documentation, colour-coding, marking, material testing, proper packing and transportation.

Product Quality

Allmach is a industry leader in piping systems and through our 25 years of operation we have grown into one of the most renowned piping system companies in Australia, and this is because of our superior quality products and attention to detail.

Our company is thoroughly safety-conscious and our products comply with all strict standards and regulations.

We are fully committed to the safety and protection of our employees, the environment, neighbours and customers. To support this commitment, we made sure that our products:

- Comply with Australian standards;
- Are fully guaranteed from 10 years to 50 years;
- Are made of non-flammable materials;
- Are High-Corrosion resistance;
- Support energy savings; and
- Are designed to be aesthetically pleasing.

Our quality policy is to provide you, our customer, with services and products that not only meet your expectations, but go above and beyond.

As such, we are continuously monitoring our operations and are committed to ensuring that improvements are implemented where needed.

The team at Allmach strongly believe that the most innovative, high quality products can boost efficiency gains and lower company expenses; and this is the primary key to our success in the industry.

With solid quality management systems, we certify that our products always pass Australian and industry standards and by doing so, surpass mandatory requirements.

Product Ranges

Maxair Compressed Air Piping Systems

Maxair PE100 PN25 Plastic Piping Systems is a product of advanced materials technology that outperforms other pipes for pressure, flow and corrosion resistance.

Simple to install, this lightweight system is robust and flexible thanks to technology that makes it easy to alter or adapt. It has broad chemical resistance, is suitable for underground use and comes with a 50 year warranty.

Surepress Stainless Steel Press Fit Systems

The Surepress 316L stainless steel press fit system offers the corrosion and washdown properties of traditional stainless steel systems with many additional benefits.

FAST – up to 10 times faster than welding.

CONSISTENT – pressing tool ensures each press is the same every time.

SAFE – no heavy tools, no fire hazard and no mess.

COST EFFECTIVE – reduced installation time, no consumables or welding gas hire.

HYGENIC – polished stainless steel surface, free from grease, oil and any corrosion aiding materials.

UPVC Piping

UPVC piping shows exceptional characteristics in the temperature range, ensuring the highest possible thermal stability and chemical resistance. Other advantages include:

- Low investment for tools and equipment;
- Proven physiological harmlessness; and
- Excellent chemical and corrosion resistance.

Unipipe

Unipipe is a high pressure aluminium piping system available in a broad range of sizes and fittings and being suitable for a wide pressure range and broad temperature capabilities.

QUICK AND EASY - clicks together, with minimal tooling required to create complex piping systems.

UNIVERSAL - transports compressed air, industrial gases, water, nitrogen, fire, vacuum and oil, air and water at high pressure.

WIDE PRESSURE RANGE – suitable from -0.87 up to 200bar.

Sewer Stream

Sewerstream offers a fully sealed system designed for use with CCTV and jet rodding equipment. This allows both horizontal and vertical curves to be introduced.

The majority of access structures in a sewerstream system are PE maintenance shafts, welded into the system. Man holes will only be placed at complex junctions and at strategic locations as required.

Further list of Products

- Coil Hose & Straight Tube
- Air Hose reels
- Falcon Filtration/dryers
- Valves
- Push-in Fittings
- Brass & Plastic Threaded Fittings
- Compressors
- Receivers

Industries & Applications

Industries

Allmach has your complete piping solution for all types of projects – from small to large-scale piping systems. Over the years, we have supplied thousands of customers throughout various sectors and industries. Having the complete resources and 20 years of expertise in the industry, we supply and provide customised piping services to the following markets:

- Mining
- Industrial
- Manufacturing
- Automotive
- Food and beverage
- Petroleum
- Defence
- Pharmaceutical
- Education
- Energy
- Marine
- Rail & Transport
- Hospitals and Medical
- Commercial
- High-rise

Projects

Allmach products have been used in many large scale projects including:

- Ravenworth north MIA
- Mangoola Coal
- New Westrac Facility - Tomago
- Sandvik Manufacturing - Heatherbrae
- Greta Train Support Facility
- Bengalla Mine

Applications

- Hot Water
- Cold Water
- Wash down
- Potable Water
- Chilled Water
- Compressed Air
- Nitrogen
- Oil Lines
- Vacuum
- Industrial Gases
- Inert Gases
- Chemical Lines
- Petroleum Lines
- Glycol

Our pipes are proven to be reliable and durable, designed for long-service life. They have been used in numerous industrial and commercial sectors.

Design Service & Documentation

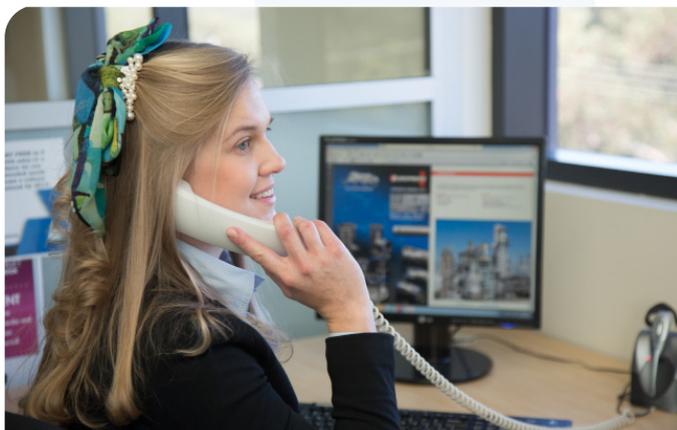

Design Service

Allmach provides design services to clients' pipeline system needs. These services include determining system requirements, equipment selection and system layout. We assist in all activities necessary to develop the planning phase of a particular industry's piping construction – cost estimates, purchasing and project implementation.

Our company has more than 25 years of experience in the piping industry – design, marketing, and distribution of superior quality pipes.

Over this period, we were able to gain extensive knowledge and expertise in piping systems planning. We have broad experience collaborating with small and large industries in the mechanical field.

Our goal is to continuously seek opportunities that will enhance our products and services for all clients.

Documentation

A major distributor and wholesaler, Allmach products include stainless steel, plastic and aluminium piping systems. We supply complete piping systems with products, services, pre-fabrication and documentation. Our experts can always collaborate with our client's engineering team to work on a specific project.

Appropriate piping system maintenance and correct documentation of the system is the foundation of quality service. Aside from the piping systems, part of the Allmach service package is to provide customers with the following:

- Technical drawings
- Catalogues
- Manuals
- Specifications

Allmach has a compilation of commonly requested documentation, which we always have available for the benefit of our valued customers.

OUR MISSION

*'To provide outstanding customer service to our clients
with the highest quality products on time, all the time.'*
